

To whom it may concern: I am an XM Satellite Radio Subrscriber. I believe it is unconstitutional that the NAB wants to stop XM users from getting traffic and weather updates. There is a very valuable, important update to people that live in the bigger cities like St. Louis, Atlanta, Seattle, D.C., etc. I don't have it for my town because I live in a very little town, but I do travel and it comes in handy. It is not like XM is exercising the rights from NAB, but they have rights as a company too. It is unjust to think the NAB could stop so many things. XM deserves to keep carrying the weather/traffic updates and supplying it to their faithful, paying subscribers like me. To sum up what I have said very briefly, I highly OPPOSE HR 4026. Thank you. Sincerely, Amber Shelton.
